

Hand Button Press Instructions

Place fabric on the nylon cutting block. Fold or stack material to cut more pieces at a time. Pull on handle to cut round button covers.

Turn the top die down and place a single round button cover and single button mold top in centre as shown in the picture.

Whilst holding the top die, use the wood dowel to push the cap firmly into the base.

Lay back component of button facing down inside the bottom die.

Place the two die pieces together on top of each other inside machine.

Firmly press down on the handle to close the button.

A covered button is now complete.
