

Water Based • Eco Friendly • Chemical Free

FABRIC PROTECTOR

Protects against: Spills, Stains, Dirt & Grime

Suitable for all fabrics including polyesters, cottons,
wools, suedes, canvas, velvets, linens

Directions for Use

1. Prepare

Pour solution into a trigger or pump spray bottle and shake well.

2. Test

Test for colourfastness, as not all textiles are colourfast. Spray hidden area until wet and wipe vigorously with a white absorbent cloth. If colour rubs off, DO NOT USE.

3. Apply

Spray an even layer of solution from 15cm distance, overlap spray using a slow, sweeping motion until material is wet. Most fabrics only require one coat however some heavier more absorbent textiles will benefit from two coats.

4. Dry

Allow a minimum of 12-24 hours for solution to fully dry before using.

5. Reapply

Reapply annually or after any deep cleaning to maintain ideal protection. Durability of protection varies with wear and individual textile.
