AQUATICA

SUPERIOR MARINE PERFORMANCE

AQUATICA fabric's advanced construction based on superior chemistry and technology is specifically designed to meet the harsh and demanding conditions of marine environments.

The fabric possesses exceptional benefits including tear, tensile and bond strength, UV and abrasion resistance, as well as higher resistance to mould and mildew.

AQUATICA is designed for use in all types of marine craft applications including biminis, dodgers, aft covers, enclosure panels, flybridge and windshield covers, including standard, buggy, convertible or T tops.

AQUATICA is easy to clean, reducing the impact of bird droppings and other substances that soil and discolour inferior fabrics.

It protects against rain, salt spray, heat and harsh solar rays, reducing maintenance costs, thus preserving the life of any boat.

Available in 11 popular marine colours, AQUATICA is backed by a genuine 3 year fabric warranty.

SPECIFICATIONS

Width	205 cm
Roll Length	30 m (nominal)
Weight	600 gsm (nominal)
Construction	Marine grade PVC coated base cloth treated to resist UV, microbial attack and wicking

CARE INSTRUCTIONS

To clean, simply wipe with a sponge or cloth moistened in warm soapy water, then dry with a clean cloth.

SPECIFIC STAIN TREATMENTS

- Prompt attention will yield better results.
- Wipe stain from 'outside in' to avoid spreading.
- With difficult stains use a proprietary brand fabric cleaner, available in large supermarkets, hardware or chandlery outlets.

WARNING

Never use furniture polishes, abrasive cleaners, steel wool or non proprietary cleaners containing solvents. These items can cause damage to the surface of the fabric and will void the warranty.
