

# LUXE

## High Performance Low-Nap Automotive UV Suede

### FABRIC CARE AND MAINTENANCE

#### Daily Cleaning

It is sufficient to dust Luxe® suede using a soft brush, a dry cloth, or a vacuum cleaner.

#### Weekly Cleaning

After having dusted, run a slightly moistened white cotton cloth over it. Avoid the use of printed absorbent cloths/papers as they can release ink onto the material.

#### Yearly Cleaning

If the upholstery is removable, Luxe® can be safely machine washed with water at about 30°C and a mild detergent; do not spin-dry. Once the upholstery is washed, let it dry in the open air and brush it delicately with a soft bristle brush. The use of the "spray extraction machine" is allowed only at very low temperatures. If the upholstery is not removable it is possible to clean Luxe® by using specific chemical-free cleaners.

Whenever using fabric cleaners or stain repellents, be sure to test on inconspicuous area before applying.

If such products are not available, please follow these instructions: dust the material with care; moisten a soft cloth or a sponge in clean water, wring it thoroughly and run it over the whole Luxe® material, making sure not to wet it excessively; rinse the cloth or sponge and repeat as necessary. Leave to dry (overnight). Once dried, in order to restore the material, brush it delicately with a soft bristle brush.

#### Spot cleaning

- Treat spills and stains as soon as possible. Gently scrape any soil or mop any liquid from the surface of the fabric. If it's thick (yoghurt, jam, etc.) use a spoon or a plastic spatula; for liquids, use non-printed absorbent paper or a sponge;
- Apply chemical-free cleaning agents by testing on an inconspicuous area before applying to stained area. Never pour a cleaning product directly onto Luxe®, be sure to apply to use a clean white cloth or a well wrung sponge. Do not saturate the fabric.
- Begin treating the stain from the outside edge into the centre in order to avoid the stain spreading;
- Avoid rubbing to prevent the stain from spreading or going deep into the material;
- If you use a sponge, rinse it in clean water and wring it well between each wipe. For the specific treatment of the different types of stains and the relative materials that should be used please contact installer or authorised dealer of product.
